Polepalli Munikanth

DevOps Engineer

Seeking for a challenging position in Information Technology firm, where the professional experience and technical skills can be put to maximum use. 3+ years of experience in Cloud & DevOps Engineer

Work History

2022-08 - 2023-03

Sr.DevOps Engineer

Techolution, Hyderabad

- Expertise in designing, implementing, and managing Continuous Delivery pipelines using **GOCD**, including pipeline creation, configuration, and management.
- Implemented a proof-of-concept (POC) of **ChatOps** using Slack slash commands to retrieve status of unused AWS resources in a single line of text, improving team collaboration and reducing response time.
- Skilled in scheduling reboots for **EC2** instances to apply software updates, security patches, and other maintenance tasks while minimizing downtime and disruption to business.
- Conducted security assessments and penetration testing to identify vulnerabilities and gaps in the system, and worked with cross-functional teams to remediate identified risks
- Integrated security testing and scanning tools, such as **SonarQube**, into the continuous integration and delivery (CI/CD) pipeline, which helped to identify and fix security issues earlier in the development cycle. This resulted in a 40% reduction in security vulnerabilities and improved overall code quality
- Knowledgeable in setting up monitoring and metrics for EC2 instances, using tools like **CloudWatch**, **Grafana**, and **Prometheus** to track performance, availability, and cost.
- Experienced in performing **AMI refreshes** for EC2 instances to ensure that the instances have the

2019-07 - 2022-08

DevOps Engineer

Tata Consultancy Services

- Continuously monitored and reviewed security logs and alerts, and investigated security incidents and breaches to ensure timely resolution and mitigation.
- Worked closely with the security team to define and implement security controls for the infrastructure, including security groups, firewalls, and access controls, using tools such as **AWS Securit**y **Hub** and **GuardDuty**
- Proactively monitored and analyzed security-related events and logs using tools such as **Splunk** and **ELK stack,** and implemented incident response procedures to address security incidents promptly
- Strong collaboration and communication skills, including experience working in **Agile/Scrum** teams, participating in code reviews, and providing technical documentation and training.
- Created automated shell script for large number of logs data archiving.
- Created website with custom Domain name along with load balancing hosted using **Route 53** in AWS
- Skilled in containerization using **Docker**, including building Docker images, creating and managing Docker containers, and deploying applications to Docker containers.
- Experienced in Branching, Merging, Tagging, and maintaining the version across the environments using SCM tools like **GIT**, CVS, and Subversion (SVN) on Linux platforms.
- Experienced in using **Ansible** for automation and configuration management of infrastructure, including writing playbooks, roles, and modules, and using Ansible Tower for centralized management and reporting.
- Skilled in using **Terraform** for **infrastructure-as-code,** including writing and managing Terraform configurations, using modules for reusability, and integrating Terraform with other

Shell Scripting

tools like Ansible and Jenkins.

- Knowledgeable in **MySQL** database administration, including installing and configuring MySQL servers, managing users and permissions, and optimizing database performance.
- Passion for continuous learning and staying up-to-date with the latest technologies and best practices in the **DevOps** and **cloud** industry.
- Proficient in configuring and managing **Sonarqube** for code quality and security analysis, including setting up rules, integrating with CI/CD pipelines, and creating reports.
- Experienced in **Linux** administration, including installing, configuring, and managing Linux servers, managing users, and permissions.
- Skilled in setting up, configuring, and maintaining CI/CD pipelines using **Jenkins,** including knowledge of pipeline-as-code, Jenkins plugins, and integrating Jenkins with other tools like **GitHub**, **JIRA**, and **Selenium**
- Created automated **shell script** for sending mail of alerts/service status checks of instances
- Worked on setting up lifecycle policies in **AWS S3.**
- Configuration of **VPC peering** connections for data transfer from one VPC to another VPC.
- Familiar with security and compliance requirements for infrastructure and applications, including GDPR, HIPAA, and PCI, and experienced in implementing security best practices like network security, **IAM roles**, and encryption.
- Created **point-to-site VPN** & Managed connection using **VPC** in AWS as per requirements
- Strong experience in deploying, managing, and scaling containerized applications using **Kubernetes**, including knowledge of Kubernetes objects such as **pods**, **deployments, services**, and **ingress**.
- Proficient in using **Maven** for building, testing, and deploying Java applications, including creating and managing Maven projects, configuring dependencies, and using plugins for automation.
- Worked with software development and testing team members to design and develop robust

solutions to meet client requirements for functionality, scalability, and performance
- Monitored automated build and continuous software integration process to drive build/release failure resolution
- Worked with cross-functional design teams to create software solutions that improved overall functionality and performance
- Used insight into user needs and requirements to quickly reach development prototyping stage

Education

2016-05 - 2019-07

B.Tech: EEE

S.V College of Engineering - Tirupathi

· Published Research paper in Industrial IOT competition

· Designed Solar Charge Controller with the help of IEDC

· Developed Cellphone based operated Landrover

· Designed Network architecture for TCS Inframinds competition

Certifications

AWS Solution Architect associate (AWS0239731)

Azure Fundamentals (MCID: 990969617)

Google Technical Support Fundamentals from Coursera

Interests

Travel

Build new things

Photography

Accomplishments

Received 6 awards in span of 3 years of TCS journey for learning, work excellence

Developed PowerShell script for automated Health check shows service improvement. It helps to

reduce manual work & save the time
